

BUSINESS VOICE SOLUTIONS

Voice services are the core of business communications. Despite advances in technology, the immediacy and nuances of voice communications remain a fundamental part of staying in touch. DSCI provides a full range of voice services, including local, long distance, toll-free, calling card, and conferencing services, with a wide selection of enhanced features. We partner with top-tier carriers to give your company robust and dependable voice services at a competitive price. When you choose DSCI to manage your business voice services, you get superior customer service and support, simplified billing and competitive pricing.

HOSTED PBX. Businesses can now enjoy the advantages of IP telephony without investing money to purchase, install and maintain expensive equipment. Hosted PBX replaces your old phone system and analog lines with a single converged network connection, while maintaining the features and control of a traditional PBX.

LOCAL SERVICE. Local voice services remain the foundation of a complete communications solution. DSCI can provide the best local services for your needs—including business lines, analog and digital PBX trunks, ISDN services, Centrex solutions, and more—at competitive rates.

LONG DISTANCE SERVICE. DSCI offers both switched and dedicated long distance services to handle your regional, in-state, interstate, and international calling. With carrier-class quality and reliability at competitive pricing, DSCI long distance services are available nationwide.

CORPORATE CALLING CARDS. Whether your employees travel across town or to the other side of the world, connect them with clients and associates using corporate calling cards from DSCI. With flexible billing options and attractive rates, keeping costs in control while keeping in touch has never been simpler.

TOLL-FREE SERVICE. Make it easier for your customers to call you by providing a toll-free number. Our toll-free services offer advanced options such as calling area routing and restrictions, time of day routing, and international toll-free service. If you have an existing toll-free number, DSCI can seamlessly transfer it without service interruption.

CONFERENCING SERVICE. Conference anytime, anywhere with our reliable conferencing services. Our on-demand conference calling provides anytime meetings for up to 96 participants worldwide without needing a reservation. Our event conference calling allows you to reserve conferencing capacity for larger calls, and offers a variety of options such as a operator monitoring and conference recording.

BUSINESS CALLING FEATURES. DSCI offers a full range of business calling features and options to add on to your existing DSCI services. Features such as Caller ID, remote call forwarding, multi-line hunting, voice mail, and more make business easier and more productive.

For more information about how DSCI can meet your complete business communication needs, please contact us today by calling 866-438-3724.
