

# Private Line Service

**DSCI's Private Line Service provides a dedicated data connection between two customer sites. This high-speed connection is not shared with any other customers and bandwidth is guaranteed.**

## Benefits

### Secure

A direct, private dedicated line ensures that your valuable information remains secure while traveling over a private network between your two locations. Unauthorized access to your network is eliminated as a threat.

### Performance Guaranteed

Dedicated line and committed bandwidth guarantee availability and eliminate performance degradation. Performance is backed up by DSCI's complete Service Level Agreement.

### Flexible

DSCI's Private Line Service offers exceptionally fast, dedicated communication at transport speeds of 1.54 Kbps up to 45 Mbps to accommodate even the most demanding load requirements.

### Reliable

Carrier-class core network delivers superior reliability, higher transmission speeds, and performance without interruptions. DSCI's Virtual Network Management Center monitors equipment, circuits and bandwidth across the network on a continuous, 7X24X365 basis, so the reliability of your connection is assured.

## Features

- Dedicated WAN (wide area network) data connection between two sites.
- Pricing based upon distance to nearest DSCI collocation and bandwidth selected.
- Routers are customer-provided and maintained.
- Available in speeds 1.54 Kbps up to 45 Mbps.
