

AccessConference OnDemand Web Conferencing

Easy to use, cost-effective web conferencing

OnDemand Web Moderator is fully integrated with OnDemand Audio Conferencing, allowing you to manage your conference calls and change account options online. Share desktop applications and presentations with anyone, anywhere, anytime. Record slides synchronized with audio and store the files online with OnDemand Web Moderator. Real-time management tools allow you to monitor, control, and secure your live and recorded conference calls.

Features

- **Desktop Application Sharing:** show specific applications on your desktop to online meeting participants, including spreadsheets, Word documents, and your browser in order to conduct “web tours”
- **Presentation Sharing:** share Powerpoint presentation slides and other graphic images using presentation caching to speed slide delivery to meeting participants. The Chairperson has the ability to use either a pointer, highlighter, or eraser to “mark up” slides when in slide sharing mode
- **Meeting management:** manage your meetings with simple online commands--dial out to an individual or group of participants from an easy-to-use phone book, mute participants on entry for larger meetings, or mute individual lines as needed during your meeting
- **Record/Playback OnDemand:** OnDemand recording features that let you save synchronized audio/visual content for playback at your convenience. You can jump to specific slides in the recording with synchronized audio/web playback
- **Chat:** communicate with all or selected participants during the presentation. All chats will be included in the participant report
- **Q & A:** manage questions and answers during your meeting and communicate with all or selected participants during the presentation
- **Reporting:** get an instant report of who attended your live web conference via email
- **Archive management:** manage an online list of your archived recordings at any time, including play, delete, name/rename, download, or email anyone a link to the recording

Benefits

- **Easy to use:** no reservation or advance set-up is required. Simple point-and-click user interface
- **Secure:** maintain the integrity and privacy of your meeting with optional passwords for conference and record playback access, standard SSL encryption for Chairperson and participants and record playback notification and reports
- **Cost Effective:** with one low rate, one invoice, meeting with anyone at anytime is easy, and saves you the cost of travel
- **Rich feature set:** OnDemand’s extensive set of features give you dynamic conferencing capabilities at half the price of similar solutions
